Mrs. Shepherd
Supply List 2023-2024

The following items will be used in class. These items are to be kept with the student at all times. These items will not be collected from the students, so they may use them in other classes as long as they have them in calculus class.

Any scientific calculator (graphing calculators are permitted but not required)

pencils/pens - Something to write with on a daily basis

Binder/notebook/paper/folder - Students will need something on which to take notes and in which they can organize worksheets. Students may choose whatever method they wish for taking notes and staying organized. A three ring binder is recommended, but the choice of how to organize is left to the student.

Windows Laptop - As part of this course students will be programming robots and creating 3D designs using software that runs best on a Windows laptop platform (Chromebooks do not work for these applications). Students will need to be able to download software onto their laptop as part of this course.

If you do not own a windows laptop please contact Mrs. Shepherd so that arrangements can be made for you to have access to one during class.

If you have any questions, please contact me at tshepherd@holysaviormenard.com
